DETAILED ACTION

Allowable Subject Matter

Claims 1-50 are allowed.

The following is an examiner's statement of reasons for allowance: As to claims 1, 32 and 34, the prior art does not teach first searching a local database then, if no relevant information has been found, to automatically search the Internet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US PAT 5,802,524 to Flowers et al. discloses a search engine with caching but does not teach first searching the cache and then, if no relevant information is found, to automatically search the Internet, WPO patent WO 01/77883 to Limberis discloses searching a database with information from the Internet, but does not teach searching the Internet instead if there is no relevant information in the database, web page from www.howstuffworks.com discloses searching both the Internet and a local database but does not teach first searching either one and then the other if there is no relevant information found. Note: This reference is not considered to be prior art but is used to illustrate the current state of the art in searching systems and methods.
